Education

Arab Open University

Bachelor's degree in Computer Science

2020 – 2024

Very Good

Experience

Elmnasa

Backend Developer

2023 – 2024

Remote, Saudi Arabia

- Led the development of a comprehensive backend system using ASP.NET Web API, working independently on the backend while collaborating with a team of 3 Flutter developers and 1 UI/UX designer.
- Managed complex table relationships and data handling, ensuring robust functionality and scalability using Microsoft SQL Server.
- Utilized Monster ASP for deployment, with GitHub for version control, and optimized system performance by adhering to clean code principles.

Ballurh Tech

Back End Developer

2022 – 2023

Remote

- Engaged in backend development using .NET and nodejs technologies, delivering tools like social media automation solutions.
- Gained advanced backend skills under dedicated mentorship and provided solutions to improve system efficiency.

Google Developer Student Club (GDSC)

Mentor

2021 – 2022

University

- Led the Google Developer Student Club (GDSC) at my university, organizing events and tutorials to inspire and support students in their programming journeys.
- Created and delivered a tutorial titled "Steps to Start Your Path in Programming," guiding beginners through fundamental concepts and career pathways in programming.
- Produced additional technical tutorials and resources under the GDSC brand, enhancing students' learning experiences.
- Demonstrated teaching and mentoring skills through workshops and sessions, including a video tutorial available on YouTube : <https://www.youtube.com/watch?v=m9e9SoO7Msk>.

Projects

Elmnasa Backend .NET API | ASP.NET, SQL Server, Clean Code

2023 – 2024

- Developed a large-scale .NET API with many-to-many relationships and complex business logic management.
- Focused on clean code practices and optimized the system for scalability, managing millions of records.

Nusuak Project | PHP Laravel, MySQL

2024

- Contributed to the Nusuak project over two months, focusing on developing and optimizing backend features for a government-related platform in Saudi Arabia.
- Ensured system reliability, security, and scalability by following best practices in API development and database design.
- Enhanced technical expertise in PHP Laravel framework and MySQL database management while delivering robust and maintainable solutions.

Thriftiness Project | ASP.NET, Razor View, ChatGPT Integration

University Project

- Led the development of Thriftiness, a project awarded as the best university project, incorporating modern technologies such as Razor View and a chatbot powered by ChatGPT.
- Collaborated with teammates, supporting their projects and providing guidance, which enhanced their performance.

Certifications

- Completed advanced .NET backend development courses from Route, gaining practical experience in ASP.NET, SQL Server, and Entity Framework.
- Completed advanced nodeJS backend development courses from Route, gaining practical experience in nodejs, no SQL Server, and mongoDB.

Technical Skills

Languages: C#, JavaScript , TypeScript

Frameworks: ASP.NET Core, Entity Framework, XUnit,Nodejs

Databases: SQL Server, MongoDB ,MySql

Tools: Git, Redis, Docker, SignalR, External Login

Technologies: REST APIs, Clean Code, Unit Testing
